Institute promotes constant interaction with the society which involves participation of students. It also carries out research-based study tours for the students every year. These study tours are carried out with a research approach, to understand the settlement pattern and influences of local arts, crafts, vernacular architecture, various occupations, living patterns, social, religious beliefs and lifestyles on the built form. Study also includes studying architectural streetscapes, housing typologies, construction techniques, climate response planning aspects, local materials to sensitize students to the neighbourhood community and social issues. Their academic projects in the subject of Architectural Design are based on the study carried out and proposals are presented to the respective authority if feasible.

Through these social extension activities students are sensitized to the social issues and social responsibilities.

REPORT ON PLASTIC AND GARBAGE COLLECTION CAMPAIGN

DAY AND DATE: 28-10-2019, Monday

ORGANIZED BY: PDEA'S College of Architecture.

AIM: To create awareness among the students about the harmed caused to environment from plastic and garbage collection.

BRIEF: Our College Organized Plastic Collection Campaign. All staff students participated in this campaign. It was a very good experience and pleasing to know that people actually gave their time to us to listen to us and support us. However, our contribution may be little, it was satisfying to have spoken to so many people and know that everyone cares about nature. All they needed was a little push to do their bit and we were happy to provide that and implement it in our own lives.
